PHARMACOLOGY

Kidsgro is a multivitamin syrup with cod liver oil, contains B vitamins and fatty acid (cod liver oil). This combination, gives extra protection to children and gives some beneficial effects to stimulate appetite and improve digestion, promotes healthy hair, Skin & nails, good vision, strong bones & healthy teeth, increases the resistant against coughs, cold, helps to maintain healthy muscles and nervous system brain development.

Kidsgro contains Cod Liver Oil which is the nature's most abundant sources of Vitamins A and D, supplying a unique combination of health promoting properties. It is also a particularly rich source of rare eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA) which make up the important omega 3 essential fatty acids. These omega-3 fatty acids, keeps blood triglycerides in check (high triglycerides are generally linked with increased risk of heart diseases) and may inhibit the progression of atherosclerosis. They also have anti-inflammatory activity; as a result they are also helpful in Crohn's disease and rheumatoid arthritis. It has been also found that omega- 3 fatty acids are needed for prostaglandin formation. Probably as a result of their effect on prostaglandin they are responsible for blood vessel dilation. Omega- 3 fatty acids helps to treat patient with Raynaud's disease. It has been also found that EPA & DHA have some preventive role in cancer and prevent cardiac arrhythmia.
